Keyword use in document title

Essential

The document title is the text within the <title>...</title> tags in the HTML code of your web page. This chapter tries to find out how to use the search term "Maine Humor" in the document title and if it's important for Google.com.

Example: <title>Your web page title</title>

Their contents

Rank	Keyword use in document title
1	Maine Humor and Funny Maine Stories
2	Maine Humor: Welcome to Tim Sample, Maine Humorist's web site.
3	Joe Perham - Maine Humorist and Damned Funny Person
4	Maine Humor with Gary Crocker, Maine Humorist
5	Maine Humor

Keywords "Maine" or "Humor"

	Competitors	Your Site	Advice	
Number of keywords:	2 to 4	3	OK	OK
Keyword density:	10% to 50%	15%	OK	OK

Global link popularity of web site

Essential

The global link popularity measures how many web pages link to your site. The number of web pages linking to your site is not as important as the quality of the web pages that link to your site.

All major search engines take the quality and the context of the links into account. Search engines assume that your web page must offer relevant content if many quality sites link to it.

Number of inbound links according to these search engines (the more the better)

	Alexa	AllTheWeb (preset settings)	Google.com	Live.com	Yahoo.com	Peak Value
To Your Site:	1	43	1	49	30	49
To Site 1:	63	3,680	46	63	10,163	10,163
To Site 2:	18	96	10	91	213	213
To Site 3:	7	1,070	7	8	960	1,070
To Site 4:	8	648	4	59	638	648
To Site 5:	11	13	0	0	14	14
To Site 6:	905	47	7	0	41	905
To Site 7:	15	13	0	0	13	15
To Site 8:	n/a	3	2	1	9	9
Range:	1 to 905	3 to 3,680	0 to 46	0 to 91	9 to 10,163	n/a to 10,163

Advice for the global link popularity

In average, less web pages link to your page than to the top ranked pages. The average link popularity of the top ranked pages is 1,185, the link popularity of your web page is 49. You must increase the number of web pages from different domains that link to your web site. Keep in mind that all search engines also evaluate the link texts and the quality of the web pages that link to your web site.

Google can find at least as many web pages linking to your page as to the top ranked pages. This meets the basic requirements for getting high rankings on Google.

Link texts of inbound links

Essential

Inbound links are links from other web sites to your site. If many other sites link to your site, then search engines consider your site to be important. However, the number of links is not as important as is the relevance of the linking page and the link text used in linking to your site.

This chapter lists a sample of the web pages that link to your site, along with the link text. Note that search engines do not reveal all inbound links to your site.

Sample of the web pages that link to your site

Linked Text	Linked URL	Web Page That Links To Your Site
[empty]	http://mainejokes.com	http://abbottbrookguideservice.com/
[empty]	http://mainejokes.com	http://searchsight.com/30S26P1-Maine.html

http://mainejokes.com	http://mainejokes.com	http://searchsight.com/3253728-info.html
http://mainejokes.com/	http://mainejokes.com/	http://www.dbtwatercolors.com/links.html

Advice for the link texts of inbound links

To get a high ranking on Google.com, make sure that the web pages that link to your site use the search term "Maine Humor" in their link texts. The more links to your web site contain "Maine Humor" (or a part of it) in the link text, the more likely it is that your web site will get a high ranking on Google.com for that search term.

It is advisable to use different but related keywords for the link texts. If all links to your web site use exactly the same link text, then Google.com might lower your rankings because of unnatural linking patterns.

In addition, the quality and reputation of the web pages that link to your site is very important to

Advice for the link texts of inbound links

the search engines.

At least 10% of the analyzed inbound link texts contain the search term "Maine Humor". This is good.

OK

At least 20% of the analyzed inbound link texts contain the search term "Maine Humor". This is good.

OK

Less than 40% of the analyzed inbound link texts contain the search term "Maine Humor". You must increase the number of inbound link texts that contain that search term.

<<

Less than 60% of the analyzed inbound link texts contain the search term "Maine Humor". You must increase the number of inbound link texts that contain that search term.

<<

Less than 80% of the analyzed inbound link texts contain the search term "Maine Humor". You must increase the number of inbound link texts that contain that search term.

<<

Keyword use in body text

Essential

The body text is the text on your web page that can be seen by people in their web browsers. It does not include HTML commands, comments, etc. The more visible text there is on a web page, the more a search engine can index. The calculations include spaces and punctuation marks.

	Competitors	Your Site	Advice	
Number of keywords:	0 to 51	4	OK	OK
Keyword density:	0% to 8%	1%	OK	OK

Age of web site

Very Important

Spam sites often come and go quickly. For this reason, search engines tend to trust a web site that has been around for a long time over one that is brand new. The age of the domain is seen as a sign of trustworthiness because it cannot be faked. The data is provided by Alexa.com (or Archive.org if Alexa.com does not have data about a site).

Dates of the domain registration or of the first contents

	URL	Registration Date
Your Site	http://mainejokes.com/	Tuesday, May 23, 2000
1	http://www.laughmaine.com/	Wednesday, August 11, 2004 (newest domain)
2	http://www.timsample.com/	Monday, May 05, 1997 (oldest domain)
3	http://www.joeperham.com/	Sunday, August 08, 2004
4	http://www.garycrocker.com/	Sunday, August 20, 2000
5	http://www.mainecottagegarden.com/humor/humor.html	Wednesday, October 17, 2001
6	http://www.resourcehelp.com/me_humor.htm	Friday, October 09, 1998
7	http://www.shermans.com/Humor/	Monday, December 07, 1998
8	http://members.tripod.com/~Scott_Michaud/H-D-Maine-jokes.html	Saturday, September 16, 2000
Range	Monday, May 05, 1997 to Wednesday, August 11, 2004	

Advice for the web site age

Your web site is about 8 years old. This is very good because the older your web site, the better it is for your rankings on Google.com.

OK

Keyword use in H1 headline texts

Very Important

H1 headline texts are the texts that are written between the <h1>...</h1> tags in the HTML code of a web page. Some search engines give extra relevance to search terms that appear in the headline texts. This chapter examines if this applies to Google.com, too.

Example: <h1>your very big headline text</h1>

Your contents

No.	H1 Heading Text
1.	Maine Jokes Online

Advice for your H1 headline texts

Search term: "Maine Humor"

Number of keywords:	all 0	1	Remove the keywords "Maine" or "Humor".	<<
Keyword density:	all 0%	17%	It seems to be better to remove the keywords "Maine" or "Humor".	<<

Keyword use in domain name

Important

The domain name is the main part of the web page address. This chapter tries to find out if Google.com gives extra relevance to search terms within the domain name.

Example: "your-keyword" is the domain name of <http://www.your-keyword.com>

Their contents

Rank	Words In Domain Name	URL
1	laughmaine	http://www.laughmaine.com/
2	timsample	http://www.timsample.com/

10	[Web page was not analyzed. Reason: see at the top of the report.]	

Your contents

mainejokes (Domain name: "mainejokes.com")

Advice for the domain name

The domain name mainejokes.com contains only a part of the search term "Maine Humor". This is acceptable.

Keyword use in page URL

Important

The page URL is the part after the domain name in the web page address. This chapter tries to find out if Google.com gives extra relevance to search terms within the page URL. Separate your search terms in the page URL with slashes, dashes or underscores.

Example: "keyword/another-keyword.htm" is the page URL of <http://www.domain.com/keyword/another-keyword.htm>

Their contents

Rank	Words In Page URL	URL

Keyword density:	0% to 50%	0%	You could increase the keyword density for the keywords "Maine" or "Humor" but this is optional.	<

Links from social networks

Important

On social network sites, people decide which web sites are popular. This means that the popularity on social network sites cannot be easily influenced. For this reason, search engines might trust web sites more if they are popular on social networks. ("n/a" means "data not available".)

Links from social networks (the more the better)

	Del.icio.us	Digg	Total
To Your Site:	0	0	0
To Site 1:	0	0	0
To Site 2:	1	0	1
To Site 3:	0	0	0
To Site 4:	0	0	0
To Site 5:	0	0	0
To Site 6:	10	0	10
To Site 7:	4	0	4
To Site 8:	5	1,519	1,524
Range:	0 to 10	0 to 1,519	n/a to 1,524

Advice for the links from social networks

None of the selected social network sites found pages that link to your web site "mainejokes.com". Try to get at least one web page to link to your web page on these social networks.

Server speed

Important

Popular web sites often have faster server response times compared to smaller unimportant sites. In addition, most search engines index more pages from fast web sites. This chapter shows you how long it takes on average for web pages on the top ranked sites to load. The data is based on the average server speed of the last 30 days and is provided by Alexa.com ("n/a" means that Alexa.com does not have data about your server speed).

Server speed results

Average Page Load Time (measured in seconds, the lower the better)

Your Site	1	2	3	4	5	6	7	8	Range
n/a	n/a	n/a	n/a	n/a	n/a	2.43s	n/a	1.27s	1.27s to 2.43s

Server Speed Relative To Other Servers On The Internet (the faster the better)

Your Site	1	2	3	4	5	6	7	8	Range
n/a	n/a	n/a	n/a	n/a	n/a	average: bottom 45%	n/a	fast: top 25%	average: bottom 45% to fast: top 25%

Advice for the server speed

The speed of your web site could not be determined. In general, the faster your web site, the better it could be for your rankings on Google.com. If you have a slow web site, you should contact or even switch your web hosting provider.

Keyword use in H2-H6 headline texts

Important

H2, H3, H4, H5 and H6 headline texts are the texts that are written between the <h2>...</h2>, <h3>...</h3>, etc. tags in the HTML code of your web page. Some search engines give extra relevance to search terms that appear in the headline texts. This chapter examines if this applies to Google.com, too.

Example: <h3>your big headline text</h3>

Your contents

No.	Heading Texts
1.	[H2] Day Care Gone Wrong: Child Piercings
2.	[H2] Baby Laughing
3.	[H2] Laugh, Chuckle, Cry
4.	[H2] Get the Joke of the Week!
5.	[H2] Recent Posts
6.	[H2] Marketing
7.	[H2] Archives
8.	[H2] Meta

Advice for your H2-H6 headline texts

Search term: "Maine Humor"

	Competitors	Your Site	Advice	
Number of keywords:	0 to 7	0	You could use the search term "Maine Humor" at least once but this is optional.	<

Keyword density:	0% to 8%	0%	You could increase the keyword density for the keywords "Maine" or "Humor" but this is optional.	<

Keyword use in IMG ALT attributes

Important

The attribute defines an alternative text for an image when the user uses a text browser or when the user has turned off the display of images in the web browser application. Microsoft's Internet Explorer displays the alternative text if the user puts the cursor over the graphic. This chapter tries to find out if it makes sense to include the search term in the attributes to improve your rankings.

Example:

Your contents

No.	Image Alt Attribute Text	Image File Name
1.	Maine Jokes Online Rotating Header Image	http://mainejokes.com/wp-content/themes/primepress/rotating.php?image=62
2.	[empty]	http://mainejokes.com/wp-content/uploads/2008/11/kid.jpg

Advice for your IMG ALT attributes

Number of keywords:	0 to 3	0	You could use the search term "Humor" at least once but this is optional.	<
Keyword density:	0% to 9%	0%	You could increase the keyword density for the search term "Humor" but this is optional.	<

Keywords "Maine" or "Humor"

	Competitors	Your Site	Advice	
Number of keywords:	0 to 6	1	OK	OK
Keyword density:	0% to 9%	8%	OK	OK

Top level domain of web site

Important

Web sites with certain top level domains (TLD) are statistically more likely to contain higher quality, trustworthy contents. For this reason, search engines might prefer web sites with restricted TLD (.edu, .gov., .mil) over younger TLD (e.g., .biz, .info, .jobs). In addition, country code TLD (e.g., .ca, .de, .fr) are often preferred in the country's local search results.

Top level domain results

Your Site	1	2	3	4	5	6	7	8
.com	.com	.com	.com	.com	.com	.com	.com	.com

Advice for the top level domain of your web site

Your web site URL mainejokes.com contains the often used top level domain .com. This is neither good nor bad for your rankings on Google.com.

OK

Keyword use in bold body text

Important

The body text is the text on your web page that can be seen by people in their web browsers. The bold body text uses a darker and heavier face than the regular type face. It appears between `...` or `...` tags in the HTML source of your web page. CSS is not recognized. The statistics include spaces and punctuation marks.

Their contents

Rank	Keyword use in bold body text

Keywords "Maine" or "Humor"

	Competitors	Your Site	Advice	
Number of keywords:	0 to 15	1	OK	OK
Keyword density:	0% to 9%	17%	The keyword density for the keywords "Maine" or "Humor" is too high. It should be 9% at maximum. Consider adding more text to lower the keyword density for these words.	<<

Number of visitors to the site

Important

Search engines might look at web site usage data, such as the number of visitors to your site, to determine if your site is reputable and contains popular contents. The Alexa.com traffic rank is based on three months of aggregated traffic data from millions of Alexa Toolbar users and is a combined measure of page views and number of site visitors.

Alexa.com Traffic Rank results (the lower the better)

	URL	Alexa Traffic Rank
Your Site	http://mainejokes.com/	n/a
1	http://www.laughmaine.com/	Rank #2,595,456
2	http://www.timsample.com/	Rank #17,451,778
3	http://www.joeperham.com/	Rank #12,039,379
4	http://www.garycrocker.com/	Rank #20,712,250 (least visitors of the competitors)
5	http://www.mainecottagegarden.com/humor/humor.html	Rank #6,700,130
6	http://www.resourcehelp.com/me_humor.htm	Rank #144,854 (most visitors of the competitors)
7	http://www.shermans.com/Humor/	Rank #4,363,036
8	http://members.tripod.com/~Scott_Michaud/H-D-Maine-jokes.html	Rank #4,932,731
Range		144,854 to 20,712,250

Advice for the number of visitors to your site

The number of visitors to mainejokes.com could not be determined. In general, the more visitors you have, the more advantageous it could be to your rankings on Google.com.

Keyword use in same site link texts

Moderately Important

Link texts are words and sentences that are used as links. Same site link texts are the link texts of the links that point to a web page on the same domain. This chapter examines if Google.com takes search terms in same site link texts into account.

Example: The HTML tag `Contact information` contains the same site link text "Contact information".

Keyword use in outbound link texts

Moderately Important

Link texts are words and sentences that are used as links. Outbound link texts are the texts within the `<a>...` tags when the `<a>` tag links to a web page on a different domain. This chapter examines if Google.com gives relevance to search terms in outbound link texts.

Example: The HTML tag `About the company` contains the outbound link text "About the company".

Keyword use in meta description

Moderately Important

The Meta Description tag allows you to describe your web page. This chapter tries to find out if Google.com takes the Meta Description tag into account. Some search engines display the text to the user in the search results.

Example: <meta name="description" content="This sentence describes the contents of your web site.">

Even if the Meta Description tag might not be important for ranking purposes, you should use the Meta Description tag to make sure that your web site is displayed with an attractive description in the search results.

Their contents

Number of trailing slashes in URL

Moderately Important

The number of trailing slashes (/) in the URL indicates where a web page falls in a site's overall hierarchy. If the URL contains many trailing slashes, meaning it is placed in a sub-sub-directory, then the webmaster does not seem to think that the page is important in relation to the other pages.

Number of trailing slashes

Your Site	1	2	3	4	5	6	7	8	Range
0	0	0	0	0	1	0	1	1	0 to 1

Advice for the number of trailing slashes in your web site URL

The URL mainejokes.com does not contain more or less trailing slashes than the top ranked pages. This means that you do not have to change the number of trailing slashes in your URL.

OK

HTML validation of web page to W3C standards

Slightly Important

Web pages are written in special languages called HTML and CSS. Like any language, HTML and CSS change constantly. The World Wide Web Consortium (W3C) is the governing body that establishes what is valid HTML/CSS and what is not. Search engines obey the HTML/CSS standard. If there are errors in the HTML/CSS code of your web page, then search engines might not be able to read everything of your web page.

Validation results

	Validity
HTML:	11 errors, not valid http://validator.w3.org/check?uri=http://mainejokes.com/
CSS:	no errors, valid http://jigsaw.w3.org/css-validator/validator?uri=http://mainejokes.com/

Advice regarding the validity of your web site

The HTML validation of your web page mainejokes.com failed. This means that Google.com might not be able to read your web page. You should fix any HTML errors.

Readability level of web page

Slightly Important

The Flesch Reading Ease test is a United States governmental standard to determine how easy a text is to read. It measures the approximate level of education necessary to understand the web page content. Higher scores indicate the text that is easier to read, and lower numbers mark harder-to-read texts. Scores among different languages are not comparable.

Readability results

Flesch Reading Ease Score (0-100, higher score means that the text is easier to understand)

Your Site	1	2	3	4	5	6	7	8	Range
82	59	n/a	75	71	61	65	63	75	59 to 75

Flesch-Kincaid Grade Level (shows the number of years of education required to understand the text)

Your Site	1	2	3	4	5	6	7	8	Range
5	10	n/a	7	7	8	6	11	6	6 to 11

Advice for the readability of your web site

The Flesch Reading Ease Score of your web page mainejokes.com is 82. A score of 60 to 80 is considered to be optimal. This means that the text of your web page is easy to comprehend.

OK

Keyword use in meta keywords

Slightly Important

The Meta Keywords tag allows you to define which search terms are important to your web page according to your opinion. It should be placed between the <head>...</head> tags in the HTML code of your web page. This chapter tries to find out if Google.com gives relevance to search terms in the Meta Keywords tag.

Example: <meta name="keywords" content="keyword, another keyword">

Their contents

Keyword use in the first sentence of the body text

Slightly Important

The first sentence of the body text is the first sentence after the <body> tag in the HTML code of your web page. Some search engines give more relevance to search terms when they appear in the first sentence. Some will use your first sentence as the description of your page on the search result page.

Example: <body>Here goes the first sentence. This text is not the first sentence.

Their contents

Search engine compatibility

This chapter examines the general search engine compatibility of your web page.

Advice

Search engines need text to index your web pages, to determine the theme of your web site and to produce a site summary. They cannot read what is written on your graphical images or in a Flash movie. Google recommends to create a useful, information-rich site. Fresh, continuously updated content is one of the best ways to ensure that search engines return to your web site (and your visitors, too). Your web page "mainejokes.com" contains 213 words which should be enough for search engines.	OK
Some search engines penalize web sites if the search terms of the Meta Keywords tag don't appear in the body text of the web page. The search terms "maine cartoons", "maine funny pages" and "maine funny photos" of your Meta Keywords tag do not seem to be mentioned in the body text of your web page. You should either remove these search terms from your Meta Keywords tag, or add the search terms to the body text of your web page.	<<
Your web page doesn't use the Meta Refresh tag so there won't be any problems with the search engines in this aspect.	OK
Your web page doesn't use the Meta Robots tag so there won't be any problems with the search engines in this aspect.	OK
Your web page doesn't use the Meta Title tag so there won't be any problems with the search engines in this aspect.	OK
Your web page doesn't use any Dublin Core meta tags so there won't be any problems with the search engines in this aspect.	OK
Your web page uses the Meta Generator tag twice. Search engines could regard it as a spamming attempt and might decide not index to your web site. You should remove the second Meta Generator tag, even if it's embedded in an <iframe> tag.	<<
Your web page doesn't use the <title> tag twice so there won't be any problems with search engines in this aspect.	OK
Some search engines and directories don't accept submissions with capitalized letters in the document title or in the meta tags. Your web page doesn't use all capitalized letters in those web page elements so there won't be any problems with the search engines in this aspect.	OK
Your web page uses script code in an external file so you've already minimized the problems with scripts and the search engines.	OK
Your web page uses style sheet code in an external file so you've already minimized the problems with style sheets and the search engines.	OK
Your web page doesn't use frames so there won't be any problems with the search engines in this aspect.	OK
Some search engines consider tiny text (i.e. font size 1) as an attempt to fool the search engines. Some webmasters have abused tiny text in the past to hide dozens of keywords on a web page that human web surfers cannot see. Your web page doesn't seem to use tiny text so there shouldn't be any problems with the search engines in this aspect.	OK
Your web page URL "mainejokes.com" doesn't indicate a dynamically served web page so there shouldn't be any problems with the search engines in this aspect.	OK
Your web page URL "mainejokes.com" doesn't contain any of the special characters "&", "\$", "%",	OK

Advice

"?" or "=" in it so there shouldn't be any problems with the search engines in this aspect.

Some search engines and directories rank web sites lower that are hosted at free web space providers, or if web sites don't have their own domain name. Some search engines also limit the number of web pages they'll index from a single domain. Your web site doesn't seem to be hosted at a free web space provider. If it does, consider getting your own domain name.

OK

Factors that could prevent your top ranking

Some ranking factors cannot be measured because the search engines do not reveal the necessary data, or it would be extremely time-consuming to measure the data. Make sure you pay attention to the following factors because they could prevent a top ranking for mainejokes.com on Google.com.

Advice

Inbound links to your web page

Are the web pages linking to your web page relevant to the search term "Maine Humor"?

How fast does your web page get new links pointing to it?

Do the web sites which link to your page belong to the same content category?

Since when do the links to your page exist?

Is the text surrounding the link to your page relevant to the search term "Maine Humor"?

Your web page

How many important links from your other pages point to your web page?

Do the links on your web page point to high quality, topically-related pages?

How often and how many changes do you make to your web page over time? Is your content up-to-date?

How often and how many web pages do you add to your web site?

How long do your visitors spend time on your web page?

Search engine result page

Do your competitors on the search engine result page get a manual ranking boost by Google.com, for example Amazon or Wikipedia?

How many visitors of the search engine result pages click through to your page?

How often do search engine visitors search for your company name or web page URL on Google.com?

Negative ranking factors (you should be able to say "no" to all the following questions)

Is your content very similar or a duplicate of existing content?

Is your server often down when search engine crawlers try to access it?

Do you link to web sites that do not deserve a link?

Do you use the same title or meta tags for many web pages?

Do you overuse the same keyword or key phrase?

Do you participate in link schemes?

Do you actively sell links on your web page?

Do a majority of your inbound links come from low quality or spam sites?

Does your web page have any spelling or grammar mistakes?

Table: Ranking factors digest

This chapter shows some of the search engine ranking factors in tabular form. Some of the values may have been abbreviated by using "k" which means that the value must be multiplied by 1000. ("n/a" means "data not available".)

Digest										
	Your Site	1	2	3	4	5	6	7	8	Range
Number of inbound links according to these search engines (the more the better)										
Alexa:	1	63	18	7	8	11	905	15	0	0 to 905
AllTheWeb (preset settings):	43	4k	96	1k	648	13	47	13	3	3 to 4k
Google.com:	1	46	10	7	4	0	7	0	2	0 to 46
Live.com:	49	63	91	8	59	0	0	0	1	0 to 91
Yahoo.com:	30	10k	213	960	638	14	41	13	9	9 to 10k
Links from social networks (the more the better)										
Del.icio.us:	0	0	1	0	0	0	10	4	5	0 to 10
Digg:	0	0	0	0	0	0	0	0	2k	0 to 2k
Other ranking factors results (the older or the lower the better)										
Web Site Age:	May 2000	Aug 2004	May 1997	Aug 2004	Aug 2000	Oct 2001	Oct 1998	Dec 1998	Sep 2000	May 1997 to Aug 2004
Server Speed:	n/a	n/a	n/a	n/a	n/a	n/a	2.43s	n/a	1.27s	1.27s to 2.43s
Alexa Traffic Rank:	n/a	2,595k	17,452k	12,039k	20,712k	6,700k	145k	4,363k	4,933k	145k to 20,712k
